Absolutely. Plus, the information we would want to get regarding Lead and Copper Rule sample sites both past and more recent should have been submitted to the WVDHHR District Office, so the WV folks should have what we would be interested in seeing in regards to documentation that Clarksburg should have submitted to the state to justify changes to their sample sites. So, I think we should ask WVDHHR first to see what they can produce, then go to the water system.

Thanks Rick. I like the info request too, but I think we need to coordinate that with the state beforehand. Let's be ready to go with something, but I don't want to proceed without them being made aware.
